

Task Overview:

Develop a **Next.js** project based on the given [Figma design](#). The design includes **six sections**, but only **three sections** need to be implemented, with the **Hero section being mandatory**. The project must be **fully responsive** and include **MetaMask wallet connectivity**.

Requirements:

1. Next.js Development:

- Use **Next.js** for the frontend implementation.
- Implement only **three sections** (including the **Hero section**).
- Ensure **mobile and web responsiveness**.

2. Hero Section Implementation:

- The **Hero section is compulsory** and must be fully functional.
- Integrate the **provided animation** from Google Drive using **Lottie** or another suitable method.
- Use **Framer Motion** or CSS animations for smooth effects.

3. MetaMask Wallet Connection:

- Implement a **"Connect Wallet"** button.
- Use **ethers.js** or **wagmi** to connect to MetaMask.
- Display the connected wallet address after successful connection.

4. Styling & UI:

- Use **Tailwind CSS** for styling.
- Ensure the design matches the Figma layout.

5. Deployment:

- Push the completed project to **GitHub**.
 - Deploy it on **Vercel** and provide the live link.
-

Evaluation Criteria:

- ✓ **Responsiveness** (Mobile & Web compatibility)
- ✓ **Hero Section with Animation**
- ✓ **MetaMask Wallet Connectivity**
- ✓ **Code Structure & Best Practices**
- ✓ **Deployment on GitHub & Vercel**

Timeline:

- **Deadline: 7 days from today**
- **Status Update Required: Upon completion**
